

<b>Georg-August-Universität Göttingen</b> <b>Module B.Inf.1237: Deep Learning</b>		6 C 4 WLH
<b>Learning outcome, core skills:</b> Students <ul style="list-style-type: none"> <li>• learn concepts and techniques of deep learning and understand their advantages and disadvantages compared to alternative approaches</li> <li>• learn to solve practical data science problems using deep learning</li> <li>• implement deep learning techniques like multi-layer perceptrons, convolutional neural networks and other modern deep learning architectures</li> <li>• learn techniques for optimization and regularization of deep neural networks</li> <li>• learn applications of deep neural networks for computer vision tasks such as segmentation and object detection</li> </ul>		<b>Workload:</b> Attendance time: 56 h Self-study time: 124 h
<b>Course: Deep Learning for Computer Vision (Lecture)</b> Goodfellow, Bengio, Courville: Deep Learning. <a href="https://www.deeplearningbook.org">https://www.deeplearningbook.org</a> Bishop: Pattern Recognition and Machine Learning. <a href="https://cs.ugoe.de/prml">https://cs.ugoe.de/prml</a>		2 WLH
<b>Examination: Written examination (90 minutes)</b> <b>Examination prerequisites:</b> B.Inf.1237.Ex: At least 50% of homework exercises solved and N-1 attempts presented to tutors <b>Examination requirements:</b> Knowledge of basic deep learning techniques, their advantages and disadvantages and approaches to optimization and regularization. Ability to implement these techniques.		6 C
<b>Course: Deep Learning for Computer Vision - Exercise (Exercise)</b> <i>Contents:</i> Students present their solutions of the homework exercises to tutors and discuss them with their tutors.		2 WLH
<b>Admission requirements:</b> none	<b>Recommended previous knowledge:</b> Basic knowledge of linear algebra and probability Completion of B.Inf.1236 Machine Learning or equivalent	
<b>Language:</b> English	<b>Person responsible for module:</b> Prof. Dr. Constantin Pape Prof. Dr. Alexander Ecker	
<b>Course frequency:</b> each winter semester	<b>Duration:</b> 1 semester[s]	
<b>Number of repeat examinations permitted:</b> twice	<b>Recommended semester:</b> 5	
<b>Maximum number of students:</b> 100
