

Georg-August-Universität Göttingen Module B.Inf.1241: Computational Optimal Transport		6 C 4 WLH
Learning outcome, core skills: Knowledge of <ul style="list-style-type: none"> the fundamental notions of optimal transport, and its strengths and limitations as a data analysis tool the discrete Kantorovich formulation, its convex duality, and Wasserstein distances classical numerical algorithms, entropic regularization, and their scopes of applicability examples for data analysis applications. Students can transfer these to new potential applications 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Computational Optimal Transport (Lecture, Exercise)		4 WLH
Examination: Written exam (90 minutes) or oral exam (approx. 20 minutes) Examination prerequisites: At least 50% of homework exercises solved. Examination requirements: Knowledge of Kantorovich duality, Wasserstein distances, standard algorithms and implications for data analysis applications.		6 C
Admission requirements: none	Recommended previous knowledge: Foundations of linear algebra and analysis (e.g. B.Mat.0801 and B.Mat.0802) and programming skills (e.g. B.Inf.1842).	
Language: English	Person responsible for module: Prof. Dr. Bernhard Schmitzer	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 4 - 6	
Maximum number of students: 50
