Module B.Phy.5625: X-ray physics	

Module B.Phy.5625: X-ray physics Learning outcome, core skills: Knowledge in: Radiation-matter interaction Dosimetry, radiobiology and radiation protection Contaction and resistance and all attention 124 h

- Scattering experiments: photons, neutrons and electrons
 Fundamental concepts in diffraction and Fourier theory
- · Structure analysis in crystalline and non-crystalline condensed matter
- Generation of x-rays and synchrotron radiation
- · X-rays optics and detection
- · X-ray spectroscopy, microscopy and imaging

After taking the course, students

different techniques.

- will integrate fundamental concepts of matter-radiation interaction .
- are able to apply quantitative scattering techniques with short wavelength radiation for structure analysis of condensed matter, including problems in solid state, materials, soft matter, and biomolecular physics
- are able to plan and carry out x-ray laboratory experiments
- are prepared to participate in beamtimes at synchrotron, neutron or free-electron radiation sources

· knowledge about theoretical concepts and experimental implementations of

knowledge of laboratory skills (x-ray sources, detection, dosimetry)

· can solve analytical problems in x-ray optics, diffraction and imaging

Course: X-ray Physics Examination: Written examination (120 minutes) or oral examination (ca. 30 min.) or presentation (ca. 30 min.) Examination prerequisites: none Examination requirements: • solve problems of the topics mentioned above on a quantitative level, including calculations of structure factor, correlation functions, • applications of Fourier theory to structure analysis and basic solutions to the phase problem, • solve problems of wave optical propagation and diffraction • knowledge about interaction mechanisms and order -of-magnitude estimations,

Admission requirements:	Recommended previous knowledge:	
none	none	
Language:	Person responsible for module:	
English German	Prof Dr Tim Salditt	

Course frequency: each summer semester	Duration: 1 semester[s]
Number of repeat examinations permitted: three times	Recommended semester: Bachelor: 6; Master: 1 - 2
Maximum number of students: 15
